

ICE Market Data Subscriptions via MFT

Description and Connectivity Guide

Version 1.9

10 February 2025

Version Management

Change	Date effective	Comment
Added ICE Futures Abu Dhabi	29 March 2021	Futures only
Included Implied Volatility included	31 March 2021	Added data field
UK Emissions markets	19 May 2021	Exchange notice
EU Emissions transitioned to ICE Endex	07 June 2021	Exchange notice
Settlement Snapshot Utility Markets	16 July 2021	Exchange notice Exchange notice
Updated Settlement Snapshot Utility Markets (includes relative period and strategies). In addition, the file naming convention of the Utility Market Settlement Snapshots has been changed to align with all other files available on the ICE MFT. As per the new naming convention, the files containing the Utility Market Settlement Snapshots will end on <u>UtilityMarkets_YYYYMMDD</u> .	20 October 2021	Exchange notice Exchange notice
ICE Datacenter Migration affecting the DNS Name, IP Name, and Port	7 February 2023	Exchange notice
Added Third Publication time for Utility Markets Settlement Snapshot	16 November 2023	
Updated available history of daily Ongoing Subscription files in Sec. 2.1 History	5 January 2024	
Noted of Second Publication time on Markers and Indices in Sec 2.3	16 February 2024	
Migration of LCFS contracts from Energy Division to S2F Oil	10 February 2025	Exchange notice

ICE Data Subscriptions via MFT

1. Overview

ICE Data offers a variety of proprietary data from markets operated by ICE as well as ICE Markers and Indices. This data can inter alia be used for general market insight, compliance and risk management.

As seen on the [Report Center](#) of the ICE website, a select set of market data reports is made available over a Managed File Transfer (MFT) solution ("ICE MFT"), where subscribers can retrieve the reports in a secure, efficient and reliable manner. All data files are published in a Comma Separated Values (CSV) file.

The available subscriptions are summarized in Section 4 (Publications and Fees) and can be purchased through the [ICE Dashboard](#). The data in these reports is made available on days on which the market is open. Please visit the ICE website for [Holiday Hours](#) of the relevant ICE market.

The purpose of this Description and Connectivity Guide is to serve as a reference for ICE Data subscribers in connecting to the ICE MFT as well as interpret the content of the data files included to their subscription.

For any questions regarding the license and content, please speak with your ICE Data contact or send an email to **data@ice.com**.

For MFT connectivity support, please email **support@ice.com** or call +1 - (770) 738 -2101.

2. Content, availability, and history

2.1. End Of Day (EOD) Report - Futures & Options

Content

The EOD reports provides a daily market summary for futures and options and includes the data fields shown in table 1 (Data field in EOD Report) below.

Futures		Options	
TRADE_DATE	CLOSE_PRICE	TRADE_DATE	CLOSE_PRICE
LONG_NAME	SETTLEMENT_PRICE	LONG_NAME	SETTLEMENT_PRICE
HUB	TOTAL_VOLUME	HUB	TOTAL_VOLUME
PRODUCT	OPEN_INTEREST	PRODUCT	OPEN_INTEREST
COMMODITY	EFP_VOLUME	COMMODITY	EFP_VOLUME
STRIP	EFS_VOLUME	STRIP	EFS_VOLUME
LOW_PRICE	BLOCK_VOLUME	PUT_CALL	BLOCK_VOLUME
HIGH_PRICE	SPREAD_VOLUME	STRIKE	SPREAD_VOLUME
OPEN_PRICE		LOW_PRICE	OPTION_VOLATILITY
		HIGH_PRICE	DELTA_FACTOR
		OPEN_PRICE	

Table 1. Data fields in EOD Report

For more information about these files, please see section 5 (Data Dictionary) and section 6 (File Naming Conventions).

Availability

The EOD reports can be found in the following folders on the ICE MFT:

- Futures: */EndOfDayReports/[Market]/Futures.*
- Options */EndOfDayReports/[Market]/Options.*

The EOD files are published on the ICE MFT twice per day. The first publication includes the data for the current Trade Date as listed in table 1 above, with the exception of Open Interest. The second publication takes place the first business day following the Trade Date and updates the EOD files to include Open Interest.

The EOD files for Trade Date (D) are published at the following times.

EOD Report	US Eastern	London	Singapore
First publication	20:30 - 22:00	01:30 - 03:00 (D+1)	08:30 - 10:00 (D+1)
Second publication	06:00 - 07:00 (D+1)	11:00 - 12:00 (D+1)	18:00 - 19:00 (D+1)

Publication times and updates may vary among the various publications. Delays in publishing and/or updating files may occur due to market volatility or any other reason.

History

In addition to the daily EOD reports for futures and options, historical EOD reports are made available from the first business day of January in the previous calendar year to the current business day. Any further historical EOD data (“Back History”) is available for purchase on [ICE Dashboard](#).

2.2. Settlement Snapshot - Futures & Options

Content - Regular Settlement Snapshots

The Settlement Snapshot is a supplementary report for futures and options and includes the data fields shown in the table 2 (Data fields in Settlement Snapshot) below.

Futures	Options
SETTLEMENT PRICE DATE	SETTLEMENT PRICE
MARKET ID	DATE
HUB	MARKET ID
PRODUCT	HUB
COMMODITY CODE	PRODUCT
STRIP	COMMODITY CODE
CONTRACT TYPE	STRIP
SETTLEMENT PRICE	STRIKE PRICE
PRODUCT ID	CONTRACT TYPE
	SETTLEMENT PRICE
	PRODUCT ID
	OPTION_VOLATILITY
	DELTA_FACTOR

Table 2. Data fields in Settlement Snapshot

The Settlement Snapshot files contain the same ICE Market Types as those included in the EOD Report (above) and provide settlement data for all futures and options contracts (full curve). These files are currently not available for ICE Futures US - Energy Division nor ICE Futures Europe - S2F Oil.

Content - Utility Markets Settlement Snapshot

Additional Utility Market Settlement Snapshots are published at 18:00 London time and again on 19:00 London time, containing futures and options contracts

included in the following Market Types (Table 3. Utility Market Types - Settlement Snapshot).

ICE Futures Europe - market types	ICE Endex - market types
<u>First Publication:</u> IPE Natural Gas Futures UK Emissions Allowances UK Emissions Auction <u>Second Publication:</u> IPE Natural Gas Futures UK Emissions Allowances UK Emissions Auction CFR South China Coal Futures FOB Indo sub-bit Coal Futures gC Newcastle Coal Futures ICE Richards Bay Coal Futures ICE Rotterdam Coal Futures IPE UK Electricity Futures Base IPE UK Electricity Futures Peak	<u>First Publication:</u> Belgian Power Futures Dutch Power Futures Dutch TTF Gas Futures EU Aviation Emissions Allowances EU Emissions Allowances EU Financial Power Futures European Gas Futures German Natural Gas Futures Italian Natural Gas Futures

Table 3. Utility Market Types - Settlement Snapshot

The Utility Market Settlement Snapshots for the ICE Futures Europe market types are included in the 'ICE Futures Europe Commodities (non-S2F)' subscription. The Utility Market Settlement Snapshots for the ICE Endex market types are included in the 'ICE Endex' subscription.

The files containing the Utility Market Settlement Snapshots include the settlement data for strategies (quarter, summer, winter, calendar) as well as a relative period indicator for these strategies (e.g. M1, S3, C2).

The Utility Market Settlement Snapshot is published in separate files of which the file name ends on _UtilityMarkets_YYYYMMDD.

For more information about these files, please see section 5 (Data Dictionary) and section 6 (File Naming Conventions).

Availability

The regular Settlement Snapshot are published in the same folders as the EOD Reports.

The regular Settlement Snapshot files are published on the ICE MFT twice per day. The 'Regular Snapshot - Second publication' includes all final settlement

data for the current Trade Date. The Utility Markets - 'First and Second publication' only includes settlement data which is available at that point in time.

The Settlement Snapshot files for Trade Date (D) are published at the following times.

Settlement Snapshot	US Eastern	London	Singapore
Utility Markets - First publication	13:00	18:00	01:00 (D+1)
Utility Markets - Second publication	14:00	19:00	02:00 (D+1)
Utility Markets - Third publication	18:00	23:00	06:00 (D+1)
Regular Snapshot - First publication	17:30	22:30	05:30 (D+1)
Regular Snapshot - Second publication	18:45	23:45	06:45 (D+1)

Publication times and updates may vary among the various publications. Delays in publishing and/or updating files may occur due to market volatility or any other reason.

History

Historical Settlement Snapshot reports are made available from the first business day of January in the previous calendar year to the current business day. Settlements history is not available in the "Back History" data sets available for purchase.

2.3. Markers and Indices

The Markers and Indices publication covers Brent and WTI Crude Futures, Gas Oil Futures, RBOB Gasoline Futures and European Natural Gas.

The files containing the Markets and Indices are located in the folder */EndOfDayReports/Markers_and_Indices*.

The Markets and Indices report for Trade Date (D) is published at the following time.

Markers and Indices	US Eastern	London	Singapore
First Publication	14:55	19:55	02:55 (D+1)
Second Publication	20:00	01:00 (D+1)	08:00 (D+1)

For more information about these files, please see section 5 (Data Dictionary) and section 6 (File Naming Conventions).

History

Markets and Indices are made available from 11 November 2020 to the current business day. This is subject to change and subscribers will be given advanced notice before the ICE MFT directories are updated. Any further historical EOD data (“Back History”) is available for purchase on [ICE Dashboard](#).

3. MFT connectivity

3.1. ICE MFT ID types

There are two types of IDs for connecting to the ICE MFT. The first and most common is a service account which is intended to be used to automate the upload and download of data. The second type is a "named user" and intended for an individual's manual use or ad-hoc connection to the ICE MFT.

3.2. Access Authentication ICE

ICE supports two options through which access authentication to MFT is provisioned:

- A Named User with a username and password, or
- A Service User with a system generated secure key.

For automation of downloads, ICE requires that a separate "service" user is used. This utilises a system generated secure key in place of a password and avoids embedding passwords in data files or scripts. This also prevents a password from being changed and subsequently may cause an automation process to fail.

If you are unsure of what type of access you require or would like further information, please email iceuseradministration@theice.com or call +1 (770) 738-2101, option 1, sub-option 3.

3.3. Network connectivity

Connectivity to MFT is provided via SFTP on the standard port 22. The client-side firewall must allow port 22 outbound to our host at mft.trading.ice.com (158.224.35.66 22). This connectivity can be provisioned over the public Internet or via any of the existing dedicated connections available for connection to the ICE data center. Additional information concerning connectivity options is available on the ICE website (<https://www.theice.com/connectivity>).

3.4. SFTP clients

The ICE MFT can be accessed using SFTP clients (e.g. WinSCP, SSH, Putty, FileZilla). Please check with your internal information security department for the most appropriate solution for your organization.

For MFT connectivity support, please email **support@ice.com** or call +1 - (770) 738 -2101.

4. Publications and fees

Publication	ICE Market Type included	Annual fee
ICE Futures US - Energy Division		
Futures and Options END OF DAY	Financial Gas & Henry Hub Canadian Financial Gas Financial Power Physical Environmental Financial LNG, LNG Freight	USD 10,000

*** UK Emissions were launched May 19th, 2021. [Exchange Notice](#)

5. Data Dictionary

5.1. End Of Day (EOD) Report - Futures & Options

FIELD	DEFINITION	DATA TYPE (Max Length)
TRADE_DATE	Business day of trading	LocalMktDate
LONG_NAME	The name of the security/product being traded	String(200)
HUB	Location of Commodity	Numeric(38)
PRODUCT	Traded contract	Numeric(38)
COMMODITY	Alphanumeric identifier of Hub and Product	String(3)
STRIP	Delivery period of futures contract	Numeric(8)
PUT_CALL	only available in Options files "C" = Call "P" = Put	String (1)
STRIKE	only available in Options files - price at which the option can be exercised	Numeric(38,7)
LOW_PRICE	Lowest price traded on the screen during the last 24-hour period (2:30pm EST to 2:30pm EST)	Numeric(38,7)
HIGH_PRICE	Highest price traded on screen during the 24-hour period (2:30pm EST to 2:30pm EST)	Numeric(38,7)
OPEN_PRICE	The price at which a security first trades upon the opening of an exchange on a trading day.	Numeric(38,7)
CLOSE_PRICE	The last price at which a security trades upon the closing of an exchange on a trading day.	Numeric(38,7)
SETTLEMENT_PRICE	The price at which a contract settles once a given trading day has ended	Numeric(38,7)

TOTAL_VOLUME	Total volume of the trade (in lots)	Numeric(38)
OPEN_INTEREST	The total number of outstanding contracts (in lots)	Numeric(38,7)
EFP_VOLUME	Volume traded under “Exchange for Physical” (EFP) terms (in lots)	Numeric(38)
EFS_VOLUME	Volume traded under “Exchange for Swap” (EFS) terms (in lots)	Numeric(38)
BLOCK_VOLUME	Volume of blocked transactions (in lots)	Numeric(38)
SPREAD_VOLUME	Volume of contract spread transactions (in lots)	Numeric(38)
IMPLIED_VOLATILITY**	only available in Options files - Estimated volatility of underlying futures price fluctuations.	Numeric(38,7)
DELTA_FACTOR**	only available in Options files - Change in price of underlying future with change in options price.	Numeric(38,7)

** Included as of EOM March 2021

5.2. Settlement Snapshot - Futures & Options

FIELD	DEFINITION	DATA TYPE (Max Length)
Settlement Price Date	Date of settlement price	LocalMktDate
Market ID	Unique numerical identifier of contract (Product, Month)	Numeric(38)
Hub	Location of Commodity	String(200)
Product Name	Underlying commodity	String(100)
Commodity Code	Alphanumeric identifier of Hub and Product	String(3)
Strip	Delivery period of futures contract	String(200)
Strike Price	only available in Options files - price at which the option can be exercised	Numeric(38,7)
Contract Type	Type of trading instrument F = monthly future M = monthly future D = daily future C = call option P = put option I = index CASH = cash CS = cash	String(6)
Settlement Price	The price at which a contract settles once a given trading day has ended	Numeric(38,7)
Product ID	Unique numerical identifier of ProductName	Numeric(38)
IMPLIED_VOLATILITY**	only available in Options files - Estimated volatility of underlying futures price fluctuations.	Numeric(38,7)
DELTA FACTOR**	only available in Options files - Change in price of underlying future with change in options price.	Numeric(38,7)
RelativePeriod	Only available in Utility Markets Settlement Snapshot files.	Alphanumeric(4)

	Mx = Month, (1 < x < 999) Qy = Quarter, (1 < y < 999) Sz = Season, (1 < z < 999) Cα = Calendar, (1 < α < 999)	
--	--	--

5.3. Markers and Indices Reports

FIELD	DEFINITION	DATA TYPE (Max Length)
Date	Business day of trading	LocalMktDate
ProductName	Underlying commodity	String(100)
MarketID	Unique numerical identifier of contract (Product, Month)	Numeric(38)
Month	Contract or Delivery period of futures contract	String(200)
ShortName	Name of Marker or Index product	String(50)
Value	Marker or Index Price	Numeric
RelativePeriod	Position of Month on futures curve	String(3)
ProductID	Unique numerical identifier of ProductName	Numeric(38)
